Dear Hiring Manager,

I am writing to apply for the Systems Administrator position at your organization. I am an Enterprise IT professional with over four years of experience in enterprise systems, application administration, system operations, technical support, and software development.

In my current role as an Enterprise System Operation and Application Developer at Cooperative Bank of Oromia, I monitor and support enterprise applications and ERP systems, troubleshoot system and database issues, manage application operations, and work with technical teams to maintain reliable business services. I also have hands-on experience with databases, APIs, Linux environments, Git, Docker, and Kubernetes.

My background in software development has further strengthened my ability to diagnose application and integration issues, understand system dependencies, automate processes, and work effectively across application and infrastructure environments. I am also experienced with PostgreSQL, SQL Server, MySQL, Oracle, Node.js, .NET, React, and enterprise application support.

I am a proactive and problem-solving professional with strong analytical and troubleshooting skills, and I am eager to contribute my technical and enterprise systems experience to your organization.

Thank you for considering my application. I would welcome the opportunity to discuss how my skills and experience can contribute to your IT operations team.

Sincerely,

Taye Sirnesa Geleta
